THE CUB

JUNIOR FORENSICS ACADEMY

THE SHERLOCK SQUAD

A HANDS-ON MYSTERY WORKSHOP FOR YOUNG INVESTIGATORS!

STARTING **14 NOV**

Dear Parents, your child has been invited to solve their first real case! Young detectives will crack a mystery using real forensic techniques, while building the exact thinking skills curious minds need most.

ACTIVITIES THEY'LL LOVE!

1. **FINGERPRINTING**
Find hidden prints and discover the clues.

2. **HANDWRITING ANALYSIS**
Examine writing and uncover the truth.

3. **CHEMISTRY**
Use chromatography and simple lab tests to solve the case.

WHY THIS HELPS YOUR CURIOUS CHILD?

DEVELOPS CRITICAL THINKING
Mysteries have layered clues and no single right answer, matching how curious minds naturally like to reason.

BUILDS REAL DEDUCTIVE SKILLS
Kids test evidence and live the scientific method, building logic that transfers to math and science.

GROWS PATIENCE & RESILIENCE
A mystery can't be solved instantly, which teaches tolerance for ambiguity, a common growth area for sharp, curious kids.

STRENGTHENS COLLABORATION
Working as a team, kids learn to share theories and value other perspectives.

JOYFUL, NOT PRESSURED
It feels like play, not “more school.”

SPOTS LIMITED!

AGE GROUP
9–11 years old

GROUP SIZE
6 detectives per case

SESSION LENGTH
75 mins
